# Worqference 2023

Systematically start Web Load Testing using Apache JMeter
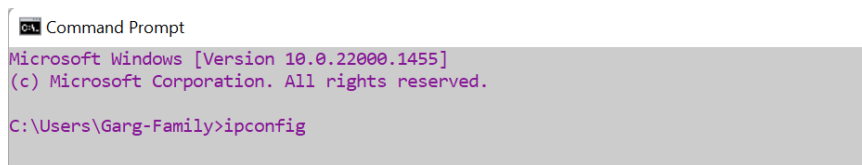

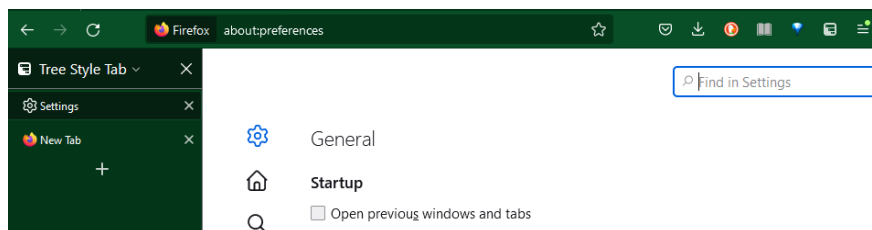

Instructor: Sandeep Garg

Setting-Up Proxy

JMeter HTTP(S) Test Script Recorder *Port*

First and foremost, find the IP Address of your machine using ipconfig command on the Command Prompt

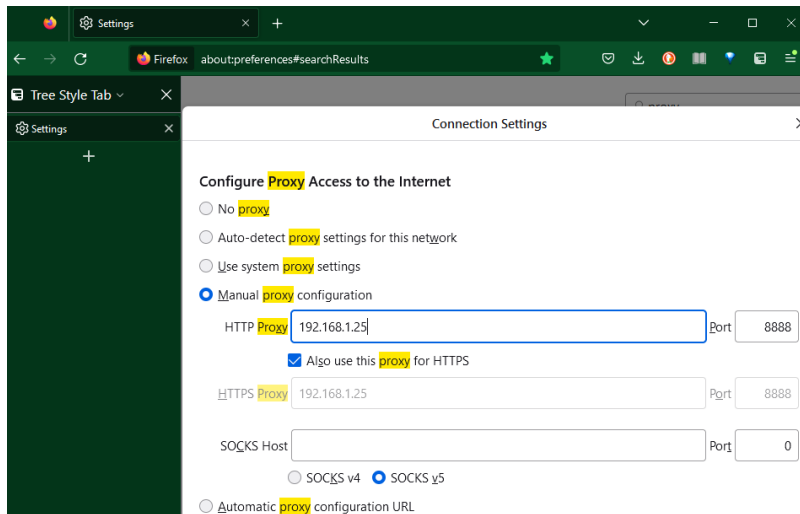

**Firefox:** Open browser and type *about:preferences* in the address bar.

Type *proxy* in the 'Find in Settings' box

Use the IP Address and port 8888 as shown below

Postman: Use the IP Address and port 8888 as shown below

Chrome: Open browser and type *chrome://settings/system* in the address bar

Then hit, *Open your computer's proxy settings* **->** Manual proxy setup **->** Set up
